<b>I have attended class:</b> <i>(unless excused for religious observance or serious illness only)</i>	I missed fewer than 2 classes and came on time to each class.	I missed between 2 and 4 classes and came late / left early no more than twice.	I missed more than 4 classes and was often late to arrive or early to depart.
<b>I have been present in class:</b>	Every class I paid the utmost attention; I was never on Facebook, watching YouTube, or catching up on the Yankees game.	I was usually engaged in class, but a few occasions I'd let my mind wander or leave the classroom entirely for a break.	I was often disengaged from the class and usually wasn't paying attention / was doing work for other classes.
<b>I have engaged in group-work:</b>	I was always engaged and working to share my knowledge and learn from my classmates.	I am usually engaged and working with my classmates, but sometimes check out or leave the room.	I was often disengaged and doing other work / on Facebook during group-work time.
<b>I have made an effort in my assignments:</b>	I recognized that the only way to truly become proficient in programming is to practice, and gave the utmost effort in completing my assignments.	I spent a reasonable amount of time on my assignments, but on two or three occasions I would prioritize other work and not spend the proper time on this class.	I rarely spent time, if any, on my assignments.
<b>I have made an effort in my final project:</b>	I was fully engaged and interested in my final project; I went above and beyond.	I was engaged in my final project but sometimes let my classmates take over the brunt of the work on my final project.	I deferred to my classmates and let them do the majority of the work on my final project.
